OVERVIEW

Computer Science Engineering graduate with a solid foundation in software development. Skilled ReactJS and Python developer, eager to build efficient web applications and contribute to dynamic tech teams. Proficient in Python for backend development and scripting with hands-on project experience. Familiar with SQL for data retrieval and manipulation.

KEY SKILLS

Programming Languages: Python, JavaScript(ReactJS)
Frontend Skills: HTML, CSS, Bootstrap
Database: SQL

PROJECTS

Image Encryption And Decryption

Creating an AI-based system to encrypt and decrypt images securely. This project uses
Machine learning to protect pictures from unauthorized access.

Realtime Weather API Using React JS

Building a Real-Time Weather App with React. Displaying current and forecasted weather using a weather API.

Password Generation

Creates a secure and random password to enhance the security in Java, based on the requirements of user and strength of the password

---

COLLAGE INTERNSHIPS

Kodnest : Java Full Stack Development

Salesforce : Salesforce Developer

HQL EduTech : Cyber Security

EDUCATION

Bachelor of Technology
Majors: Computer Science and Engineering
Bonam Venkata Chalamayya Institute Of
Technology And Science
Intermediate
Narayana Junior Collage,Vijayawada
Schooling
Aditya EM School,Amalapuram

CERTIFICATIONS

Python : In Great Learning
JavaScript : In Great Learning
